

Council Review of Committee Self Assessment System

Background information

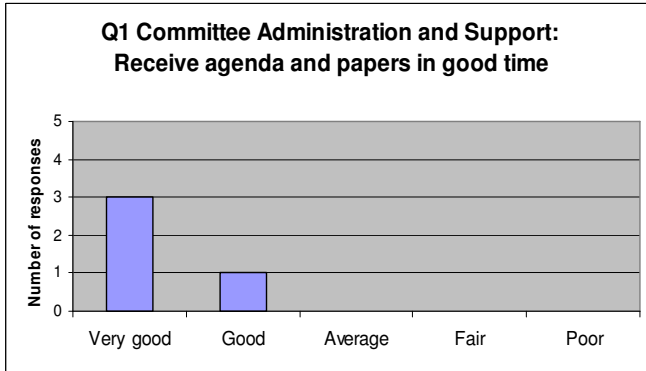

In March 2007 Council agreed that Committees should undertake an annual self-appraisal. It was also agreed that the self-appraisal form should be piloted at committee meetings and that that feedback on the process should be considered at the Council away day.

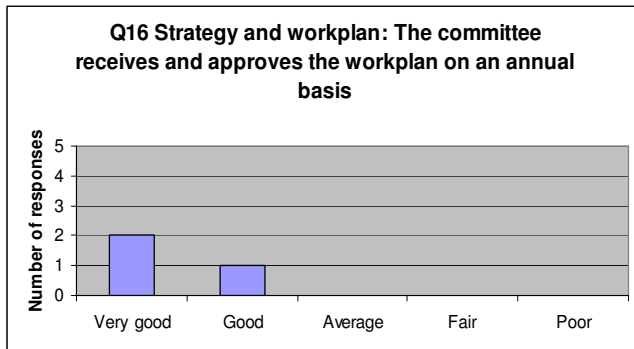

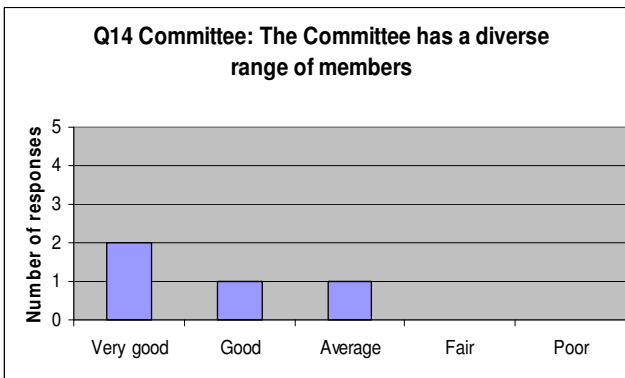

All Committees have now undertaken the self-appraisal process. The Audit and Finance and Resources Committees have reviewed the results of the evaluation. The remaining committees have completed the forms and will review the results of the evaluation at their upcoming meetings.

The results of the evaluation for each committee is attached.

One member provided feedback on this question.

"I think the Committee works well in terms of team-work, leadership, work plans and effectiveness. "If it ain't broke don't mend it" comes to mind."

Suggestions for areas to be tackled

Members were also asked:

“Please suggest five areas that you think that you should tackle to improve the way that you work as a committee over the next year.”

The responses, which are quoted below, have been grouped as far as possible under the subject headings used on the questionnaire.

Committee Administration and Support

- when should we evaluate ourselves and when should we ask outside bodies/persons to evaluate our effectiveness?
- what induction/familiarisation do we provide for new members of the Committee? How is this then elevated?
- An introduction to new members by the Chairman to summarise the aims, objectives and current issues of the Committee.

- Some feed in from senior officers about committee performance
- Adopt an agenda with time limit for each item (time to be determined by chair and executive members).
- Reduce papers printed for meeting – information to be reduced to key points with presentations/use of web.

Committee Membership

- Co-opt expertise in communications and marketing on to the Committee.
- Further understanding of each others expertise and interests
- If skills balance to be assessed, we need some idea of what the balance is and what the Committee needs e.g. PR expertise and or project management.
- Co-opt registrant or lay members with communications expertise
- Reduce the size of the committee by reducing registrant and lay members.

Strategy and Workplan

- perhaps more emphasis on why we are doing certain things – how strategic? Is it right?
- Difference between reactive and/or proactive
- Focus on creating a workplan that will help pct achieve its core purpose
- Evaluate the effectiveness of the committee on the extent to which it prepares and delivers a strategy that directly supports the corporate objectives
- Put more deliverables into the workplan
- Regular reference to committees strategic aims and actions
- Increase awareness of the role of the HPC among all our stakeholders
- Find new and varied channels of communication to achieve our objectives
- Improve communications between the Registrants and HPC
- Specify priority setting and monitoring – regularity
- Relationship between strategy and workplan and monitoring
- Clearly established communication channels will be identified during the various processes which are already in hand. When established they should form a matrix which is available to the members and will help form opinions as to influencing stakeholders on various topics relevant to each of them. A good example is the fitness to practice trends.
- The Committee may be more adept at capturing emerging issues from the cumulative committees which may impact on the operational plan of Communications. It may be that this identifies a need to prioritise on an ongoing basis throughout each financial year.

- Discussion of detail – cut down or eliminate where the matter under discussion is not a key part of the workplan

Comments about the self evaluation form

- Another heading needed for ‘Management of the Committee’.
- In general the document tends to drift from the personal comment to the collective without any real design.
- Within each headed section the same questions are repeated with a slightly different format, however I have followed the questions and answered them in the laid out format and when answered as an individual they do make sense.
- I felt the questions should be rounded down to possibly 6 utilising the headed sections and removing the duplication.
- I am still not sure of the value of this evaluation when considered by all the committees and the subsequent collation of the information. I feel it may be more useful to appraise the Chairman, the Executive and the Secretariat, possibly with three questions relating to the performance of each areas.

Suggestions for improvements to the work of the Committee

Members were asked to suggest 5 areas that they thought the committee should tackle to improve the way the committee works over the next year.

three members provided feedback on this question.

The suggestions were as follows:

- A close analysis of the trends of allegations
- An analysis of the actions taken by the Panels as sanctions
- Perhaps it should be a little clearer as to where discussions have taken place – i.e. how are conclusions in Executive papers arrived at?
- Perhaps have more time dedicated to policy and strategy so that is seen as a quite separate role and task to the administrative/progress report procedure of a normal meeting
- Consider bringing in outside experts speakers to examine particular policy areas – risk assessment, different ways of planning for the future etc etc
- More joint FtP work through forum
- More emphasis on strategy
- Bit more thought as to future planning
- Some council decisions could be delegated to FtP committees
