

HCPC Diversity Data Report 2021: chiropodists/podiatrists

Introduction

The Health and Care Professions Council (HCPC) aims to be recognised as an organisation that actively upholds and promotes best practice in equality, diversity and inclusion. Improving the quantity and quality of our diversity data is an important step towards achieving this aim.

Between December 2020 and March 2021, we collected diversity data in a voluntary survey from 51,710 registrants across 15 health and care professions. This represents 18% of the HCPC Register and a three-fold increase in responses as compared with the 2019/20 survey.

This factsheet provides the key EDI information for the chiropodists/podiatrists and how the demographics of this group compare to the demographics of HCPC registrants overall.

Profession:
chiropodists/podiatrists

Total registered chiropodists/
podiatrists:
